to ; FCC regarding ; NAB Petition 04-160

You sure have been busy recently....and there is an ugly money trail. Please do not fall to the protective lobbying of the NAB. I travel and chose to pay for the service of satellite radio for both entertainment and information while on the road, in ways that broadcast can not provide.

If there are laws/rules that weather and traffic info on satellite violate, they are outdated and unfairly protective.... and violate my rights as a consumer.

Please ignore this protective petition and let technology and competition determine what the consumer can obtain.

Don't you have a lot on your agenda already? Like punishing\fining Bono and Janet Jackson for primetime offences? (oops i forgot, money/fame won again.. you only scapegoat the little guys like Buba Luvesponge)

For the record I am a "far right" conservative. Despite my "Buba" support I do appreciate an interest in decency. I am more concerned about your lack of fairness, lack of warnings, excessive fines, and uneven enforcement. I DO NOT NEED PROTECTION FROM THE FINE PRODUCTS I PURCHASE FROM XM RADIO.

You can do something about Janet Jackson exposing herself on primetime if you want to protect my children...but you won't. Even though I find the garbage on MTV to be the cause of that exposure, leave MTV alone. why? It is subscriber driven cable, although trash.

In summary, try doing a better and more fair job of monitoring public airways, ignore the lobbyist, and LEAVE XM ALONE!
